Compatt 6+ USBL/LBL transponder and modem

Compatt 6+ is the new industry standard, Wideband®2 and 3 enabled transponder, used for high-precision survey and construction operations in all water depths. Compatt 6+ is fully compatible with all 6G® equipment and Sonardyne's latest 6G LBL, INS and USBL systems, including Fusion 2.

Compatt 6+ offers significant time saving offering fast update rates (up to 1 Hz LBL tracking), all made possible using the Wideband 3 acoustic telemetry protocols. Compatt 6+ continues to use the fast and robust Sonardyne Wideband 2 acoustic ranging protocols proven to offer accurate ranging. Support of Wideband 2 ranges maintains backwards compatibility. This makes any system operating with Compatt 6+ significantly easier to operate therefore de-risking operations, reducing vessel time and reducing training requirements for offshore personnel.

Sonardyne Wideband advanced signal processing offers improved acoustic performance in challenging conditions, longer ranges, improved multipath rejection around structures and real-time range diagnostics for quality control. Sonardyne Wideband also reduces the interference to and from adjacent Sonardyne and other acoustic positioning systems.

The integrated communications and navigation technology allows the transponder to be used as a multi-purpose modem, autonomous data logger and navigation reference transponder.

The Type 8300 Compatt 6+ is the standard length version and is based on the field proven mechanics of Compatt 6. The design offers the perfect balance between size, acoustic output and battery life. Several depth ratings are available: 3,000, 5,000 and 7,000 m, all using a hard anodised aluminium alloy with protective polyurethane sleeves.

Typical applications

- LBL positioning
- Spool piece metrology
- Sparse LBL aided SPRINT INS

Key features

- Medium Frequency (MF) band utilising Sonardyne Wideband 2 and 3 telemetry protocols
- Sonardyne Wideband 2 and HPR 400 navigation compatible
- Faster and easier to set-up, calibrate and operate
- Robust performance
- Real time diagnostics available on ranges to enable quality control
- Multiuser support included
- Automatic power-down if not used for a programmable period
- Integrated modem mode with data rates from 100 to 9,000 bps
- Highly reliable release mechanism
- Omni or directional transducer
- Standard sensors – Temperature, pressure and MEMS inclinometer
- Optional sensors – DigiQuartz, inclinometer and sound velocity
- Battery disconnect fob allows quick battery disconnection
