

# ROV Valve Bucket

[www.innova.no](http://www.innova.no)

**The ROV bucket with valve is a ROV operated 4-way directional valve for subsea use.**

The valve is used to switch hydraulic pressure between the outlets. It also has a middle "shut" position (S) to isolate hydraulic pressure from the outlets.

Materials are stainless steel and plastic, capable for long periods submerged in seawater. Mounting to panel with 8 off M6 bolts. Hydraulic interface is 4 off 3/8" BSP Female fitting.
