

Subsea Monitor

www.innova.no

The Subsea Monitor shows live video directly from connected camera. The same video can be sent topside and provide live video stream.

The monitor is equipped with handles for handheld use by a diver. Mounting to other surfaces is done with 4 ea M8 bolts (interface 160 x 170 mm) on the back side of the monitor body.

The screen turns on automatically when power or signal is provided.

Several different cameras and cable lengths can be supplied, i.e. the Teledyne Bowtech LCC-720 camera (see illustration). The monitor is delivered with support for either analogue or digital camera. Connector type is optional, standard delivery is MCBH4.
